

There has been recent concerning news regarding health issues associated with vape products. Although it not yet definitive, the Centers for Disease Control and Prevention (CDC) and the FDA suspect that inhaled Vitamin E acetate (tocopheryl acetate) is the cause. Vitamin E acetate is often added to cannabis oils in vape cartridges. **Summit does NOT use Vitamin E acetate in any of our vape products.**

Regarding vape hardware: Summit uses Jupiter LLC products, and they have issued the following statement: "...Jupiter would like to state our ongoing commitment to consumer safety and the highest level manufacturing processes. We want to reassure you that all Jupiter products adhere to the highest standards of quality and reliability in the industry. Our vaporization hardware is manufactured with CCELL technology and our suppliers follow all ISO and GMP guidelines...hardware is manufactured using medical and food grade materials. Hardware components pass stringent testing, including evaluations for heavy metals. Consumer safety and product satisfaction are, and always will be, our guiding principle..."

Summit always has been and will continue to be diligent and dedicated to being a reliable, trusted provider, offering all patients safe, top quality medicine, products, and services.
