

Getting out in public, especially if you're a senior or have comprised health, is pretty scary right now. At Summit your health is of the utmost importance to us. We are here to support you and are taking measures to make our facilities a place that you feel confident in, knowing that we have your best health at heart.

We are doing the following to ensure you are safe at summit:

- All staff is being trained in coronavirus hygiene
- We have hand sanitizer stations upon entry and throughout the facility, including at each register
 - Our staff will be hand sanitizing after each transaction
- Every hour we use a bleach solution to wipe down all surfaces, doorknobs and other high touch areas and are spraying Lysol on those places that can't be wiped.
